

# Guide to yahoo registration

To register requires filling in some details at Yahoo, there are two methods available to get the registration steps started.

Method 1: use the link provided in a sign-up request sent on request by a temsml moderator in an email. Click on the link and go from step 1 below.

Method 2: use your internet browser, enter <http://groups.yahoo.com/> When loaded follow the instructions from Step 2 below.

## Step 1

There is an initial page, click on Get web Membership.

## Step 2

Next there will be what looks like sign-in page, look for the 'sign-up' link and click. Attempting to login if you have not previously set up a yahoo profile is a waste of time :)

## Step 3

Personal details, a number of these are required but these are generally hidden from other users unless enabled later and they do not have to be real :) Your yahoo profile name will need to be unique and if the one chosen is not, then alternative suggestions are made or a new name can be entered.

The date of birth is used should you need to recover a forgotten password, keep a note if not your own :)

It will ask for a code which is found immediately below in a small graphic, this is to stop automated registration by spammers. If an error occurs entering the code then a new code is offered.

\*\*\*\* Remove the tick for yahoo mail if not required.

For convenience ensure that the 'associated email address' entered matches the one used for temsml.

## Step 4

Select the button to agree the Yahoo terms and conditions.

## Step 5

Is to say all is complete and that the Associated email address will be tested. When that email is received, simply follow the instructions in the email to complete.

If using Method 1, yahoo registration will be complete and from this page there is an option to go to the temsmaill site and take a look around. Registration is complete.

If using Method 2, select to go to the 'my groups' page using the link of that name if completing step 5 has not taken you there automatically.

An additional step is needed to complete association with your email groups, which is TEMSMail and any others that you might have; this final step is to match your email groups to this Yahoo registration. Look to the left hand side for either 'Don't see all your groups?' or 'Already receiving group email? Please visit our Membership Wizard.' click this link and then follow the instructions to find email groups.

The above procedure is also used if a different associate email address has previously been used for an earlier registration and you wish to add new email groups to your yahoo profile that uses a different email address.

Yahoo do change these occasionally so please do advise if the Yahoo page layout is significantly different from the instructions above.
